

費用代碼指南 Charge Code Guide

UPS Reconciliation · 對帳作業參考文件 Reference for reconciliation operations

1 · 用途 Purpose

費用代碼是三個系統之間共同語言。UPS 帳單、本系統與 WMS/TMS 各自以不同名稱記載同一筆費用;在「費用代碼」頁設定貴司自己的代碼與名稱後,訂單模板、對帳報表與對外交換的檔案一律採用同一套名稱,三方資料才能逐項對應。

Charge codes are the shared vocabulary across the UPS invoice, this system, and WMS/TMS. Once your own code and name are assigned on the Charge Codes page, the order template, reconciliation reports and exchanged files all use the same naming, allowing item-level matching.

2 · 欄位定義 Column definitions

「費用名稱」為系統內部名稱,是比對的依據;「系統代碼」列出 UPS 可能用以開立該筆費用的所有代碼;「你的代碼」與「你的名稱」由貴司自訂,未設定者沿用內部名稱。本頁為檢視用途,不影響任何金額計算。

Charge is the internal name used for matching. System Code lists every code UPS may bill the charge under. Custom Code and Custom Name are yours to assign; unset entries keep the internal name. The page is a view — no amounts change here.

3 · 一列何以對應多個代碼 Why one row carries several codes

UPS 會依住宅／商業性質或觸發原因,將同一類費用拆為多個代碼(例如大包裹附加費有 LCC、LCR、LCT、LPR、LPS、LWC、LWR 七碼)。系統將其收攏為一列,對帳時比對的是「一筆費用」而非六、七個代碼。代碼清單直接讀取帳單分類邏輯,顯示的代碼與金額實際歸入的列永遠一致。

UPS splits one charge into several codes by residential/commercial class or by trigger. They are folded into one row so reconciliation compares one charge, not seven codes. The list is read from the same matcher that classifies invoice lines, so display and allocation always agree.

4 · 空白的系統代碼 Blank system codes

系統代碼空白代表該筆費用不以單一代碼辨識:Demand

各項依生效日期計算得出,退件回程以運送段別辨識,第二段運送底價為推導值。此為正常狀態,並非資料缺漏。

A blank system code means no single code identifies the charge: demand charges are computed from effective dates, an undeliverable return is recognised by its leg, and the second-movement base rate is derived. This is expected, not missing data.

5 · 與訂單模板的關係 Relation to the order template

WMS/TMS 訂單模板的費用欄即以本頁的費用名稱為欄名,每一項附加費各一欄,總收取金額固定於最後一欄。來源系統的欄名(例如 TMS 將大包裹附加費與加值處理費一併記為 Delivery Surcharge)不進入本系統 —— 填表時將金額填入對應之費用欄即可。匯入時系統核對各項合計與總額,不符者逐列提示。

The order template's charge columns are named after these charges — one column per surcharge, Total Amount fixed as the last column. Source-system labels (e.g. TMS lumping LPS and AHS as "Delivery Surcharge") never enter this system: amounts are entered into the matching charge column. On import, itemized sums are checked against the Total Amount and discrepancies are listed.

附錄 · 費用與系統代碼一覽 Appendix — Charges and system codes

表列 37 項費用與 UPS 可能使用之代碼;空白者為計算得出、不以代碼辨識之費用。

費用名稱 Charge	系統代碼 System Code
Base Rate	003 · FRT
Residential Surcharge	RES
DAS Commercial	RDC
DAS Residential	RDR
DAS Extended Commercial	LDC
DAS Extended Residential	LDR
Remote Area Commercial	CAC
Remote Area Residential	CAR
Remote Area - AK	AKR
Remote Area - HI	HIC · HIR
Additional Handling Surcharge - Weight	AHW
Additional Handling Surcharge - Dimension	AHG · AHL · AHS · AHV
Additional Handling Surcharge - Packaging	AHC · AHP
Large Package Surcharge	LCC · LCR · LCT · LPR · LPS · LWC · LWR
Over Maximum Size Surcharge	OML · OVR
Undeliverable Return	—
Address Correction	ADC
Declared Value	EVS
Return To Sender	ISW
2nd Mile Road Base Rate	—
Signature	CSG · DCS · SIG
Adult Signature	ADS · ASG · ASR
Package Protection	SHD
Direct Delivery Only	DDO
Reroute	IRW
Reschedule Delivery	IFW
Returns Electronic Label	ERL
Returns Print Label	ALP
Future Day Pickup - Alternate Address - Web Request	AFW
Returns 3 UPS Pickup Attempts	ART
Residential Pickup surcharge	REP
Missing PLD Fee	NPF
Demand - AHS	—
Demand - Large Package	—
Demand - Over Maximum	—
Demand - Service	—

費用名稱 Charge	系統代碼 System Code
Fuel Surcharge	FSC
