

訂單模板填寫與對帳判讀指南

WMS / TMS Template & Reconciliation Guide • UPS Reconciliation

1 • 檔案與流程 Files and workflow

WMS 與 TMS 各自下載專屬模板、各自填寫,不共用同一份檔案。一張訂單一行;一票多件時,所有追蹤號置於同一儲存格,以逗號分隔,金額為整張訂單之合計。填妥後於「03 WMS / TMS 資料」匯入,系統受理後自動轉往「05 對帳分析」顯示結果。

WMS and TMS download and fill their own templates. One order per row; for a multi-piece order, place every tracking number in one cell separated by commas, with amounts totalled per order. Import the completed file under 03 WMS/TMS Data; on acceptance the view moves to 05 Reconciliation Analysis.

2 • 欄位規範 Column rules

版面固定為:識別四欄(深棕、凍結)→ 費用欄(琥珀,由同仁填入向客戶實收金額;WMS 13 欄、TMS 12 欄)→ 總收取金額(綠,固定於最後一欄)。費用欄依 WMS / TMS 實際的粒度設計:DAS、偏遠地區、加值處理、簽名各以一個合併欄呈現,其餘為單項。欄名即系統之費用名稱,不得增刪或改名;客戶代號為下拉選單,來源限於客戶名單。空白代表「未填」,0 代表「實收為零」,二者意義不同。

Layout: four identity columns (dark brown, frozen), the charge columns (amber, filled with the amount billed to the customer; 13 on the WMS template, 12 on the TMS template) and Total Amount (green, always the last column). Charge columns follow the granularity WMS and TMS actually keep: DAS, Remote Area, Additional Handling and Signature are one combined column each; the rest are single charges. Headers are the system's charge names and must not be renamed; Customer Code is a dropdown restricted to the client directory. Blank means not filled; 0 means billed zero — the two are not the same.

3 • 合併欄 Combined columns

下列合併欄各對應系統內的一組細項。填表時只填整組金額;系統比對時將重算與 UPS 兩側的細項加總為同一組,三方同一口徑。

Each combined column stands for a group of system charges. Fill the group total only; on comparison the recomputed and UPS sides are summed into the same group so all three figures share one definition.

Delivery Area Surcharge = DAS Commercial • DAS Residential • DAS Extended Commercial • DAS Extended Residential

Remote Area Surcharge = Remote Area Commercial • Remote Area Residential • Remote Area - AK • Remote Area - HI

Additional Handling Surcharge(WMS) = Additional Handling Surcharge - Weight • Dimension • Packaging; Large Package Surcharge 於 WMS 模板自成一欄 / stays its own column on the WMS template

Additional Handling + Large Package Surcharge(TMS) = 上列三項加值處理費 + Large Package Surcharge / the three Additional Handling charges plus Large Package Surcharge

Signature / Adult Signature = Signature • Adult Signature

Demand 四欄(AHS / Large Package / Over Maximum / Service)維持單項,暫不合併。同一組不得同時填合併欄與細項欄;細項欄名僅為相容既有檔案保留,匯入時仍可辨識。

The four Demand columns stay separate for now. A group must not carry both its combined column and its itemised columns; itemised headers remain recognised only so that files already in circulation still import.

4 • TMS 欄位對應 TMS column mapping

TMS 匯出檔之具名費用欄可直接對應:Base Rate → Base Rate; Residential → Residential Surcharge; DAS → Delivery Area Surcharge; Fuel → Fuel Surcharge; Insurance → Declared Value; Signature → Signature / Adult Signature。Delivery Surcharge 同時含大包裹附加費與加值處理費,整筆填入「Additional Handling + Large Package Surcharge」即可,不必拆分。Service Fee 屬 TMS 服務費、非承運費,僅計入總收取金額,不填入任何費

用欄;由此產生之差額會在匯入時列示,屬預期情況。

Named TMS columns map directly: Base Rate → Base Rate; Residential → Residential Surcharge; DAS → Delivery Area Surcharge; Fuel → Fuel Surcharge; Insurance → Declared Value; Signature → Signature / Adult Signature. Delivery Surcharge, which lumps Large Package and Additional Handling together, goes whole into Additional Handling + Large Package Surcharge — no allocation needed. Service Fee is a TMS fee, not a carrier charge: include it in Total Amount only. The resulting difference is listed on import and is expected.

5 • 匯入檢核 Import validation

必填欄缺漏、金額非數值、客戶代號未建檔、單號或追蹤號重複者,該列退回並逐列說明原因,整份不匯入。同一組同時出現合併欄與細項欄,或兩種加值處理合併欄並存者,整份退回並點名欄位。各費用欄合計與總收取金額不符時不阻擋,但逐單列示差額,供判斷屬服務費或漏填。

Rows with missing required fields, non-numeric amounts, unknown customer codes, or duplicate order/tracking numbers are rejected with a per-row reason and nothing is imported. A file that carries both a combined column and its itemised columns, or both Additional Handling combined columns, is rejected with the clashing headers named. When itemized charges do not add up to Total Amount the import proceeds, and each affected order is listed with its difference.

6 • 結果判讀 Reading the comparison

各客戶之出貨依其指派之費率層級重算;未指派層級者不重算,重算與兩項差異留空。逐項表就每一費用並列三數:向客戶實收(綠)、系統重算(琥珀)、UPS 實收(棕),並推出兩項差異——定價差異(實收－重算,應收是否收足)與 UPS 差異(重算－UPS,帳單與合約是否相符)。合併欄以組列呈現,細項縮排列於其下,僅有重算與 UPS 兩數;向客戶實收為整組一數。空欄代表該項未填,不以 0 計入合計。

Each customer's shipments are repriced at the assigned rate level; unassigned customers are not repriced and their figures stay blank. The itemized table sets three amounts side by side per charge — billed to client (green), recomputed (amber), charged by UPS (brown) — yielding the pricing variance (billed – recomputed) and the UPS variance (recomputed – UPS). A combined column appears as one group row with its members indented beneath it, carrying recomputed and UPS figures only; billed to client is one figure per group. Blank cells are unfilled entries and are excluded from totals.

附表 • 欄位一覽 Appendix — Columns at a glance

欄位 Column	性質 Role	規則 Rule
Order Number	識別 • 必填 Identity, required	唯一;逐項與總額均以此歸戶 Unique; keys every row
Tracking Numbers	識別 • 必填 Identity, required	多件以逗號分隔 Comma-separated for multi-piece
Customer Code	識別 • 必填 Identity, required	下拉限客戶名單 Dropdown from the client directory
Ship Date	識別 • 選填 Identity, optional	YYYY-MM-DD
Delivery Area Surcharge / Remote Area Surcharge / Signature / Adult Signature	費用 • 合併欄 Charges, combined	整組實收金額;不得與細項欄並存 Group total; never alongside its itemised columns
Additional Handling Surcharge(WMS)/ Additional Handling + Large Package Surcharge(TMS)	費用 • 合併欄 Charges, combined	WMS 的 LPS 另填 Large Package Surcharge;TMS 整筆填合併欄 WMS keeps LPS separate; TMS fills the combined column
Base Rate, Residential Surcharge, Large Package Surcharge (WMS), Declared Value, Demand ×4, Fuel Surcharge	費用 • 單項 Charges, single	填實收金額;空=未填,0=實收零 Billed amount; blank ≠ 0
Total Amount	總額 • 必填 Total, required	整單合計,固定最後一欄 Whole-order total, last column
