

訂單模板填寫與對帳判讀指南

WMS / TMS Template & Reconciliation Guide · UPS Reconciliation

1 · 檔案與流程 Files and workflow

WMS 與 TMS 各自下載專屬模板、各自填寫,不共用同一份檔案。一張訂單一行;一票多件時,所有追蹤號置於同一儲存格,以逗號分隔,金額為整張訂單之合計。填妥後於「03 WMS / TMS 資料」匯入,系統受理後自動轉往「05 對帳分析」顯示結果。

WMS and TMS download and fill their own templates. One order per row; for a multi-piece order, place every tracking number in one cell separated by commas, with amounts totalled per order. Import the completed file under 03 WMS/TMS Data; on acceptance the view moves to 05 Reconciliation Analysis.

2 · 欄位規範 Column rules

版面固定為:識別四欄(深棕、凍結)→ 三十七項費用各一欄(琥珀,由同仁填入向客戶實收金額)→ 總收取金額(綠,固定於最後一欄)。費用欄名即系統之費用名稱,不得增刪或改名;客戶代號為下拉選單,來源限於客戶名單。空白代表「未填」,0 代表「實收為零」,二者意義不同。

Layout: four identity columns (dark brown, frozen), thirty-seven charge columns (amber, filled with the amount billed to the customer), and Total Amount (green, always the last column). Charge headers are the system's charge names and must not be renamed; Customer Code is a dropdown restricted to the client directory. Blank means not filled; 0 means billed zero — the two are not the same.

3 · TMS 欄位對應 TMS column mapping

TMS 匯出檔之具名費用欄(Base

Rate、Residential、DAS、Fuel、Insurance、Signature)可直接對應至同名費用欄。Delivery Surcharge 為混合欄位,同時含大包裹附加費(LPS)與增值處理費(AHS)等 ——

填表時應依實際費用性質分別填入對應欄位,該欄名不進入本系統。Service Fee 屬 TMS

服務費、非承運費用,僅計入總收取金額,不填入任何費用欄;由此產生之差額會在匯入時列示,屬預期情況。

Named TMS columns (Base Rate, Residential, DAS, Fuel, Insurance, Signature) map directly. Delivery Surcharge is a mixed column covering LPS, AHS and others — allocate each amount to its proper charge column; the mixed label never enters the system. Service Fee is a TMS fee, not a carrier charge: include it in Total Amount only. The resulting difference is listed on import and is expected.

4 · 匯入檢核 Import validation

必填欄缺漏、金額非數值、客戶代號未建檔、單號或追蹤號重複者,該列退回並逐列說明原因,整份不匯入。各費用欄合計與總收取金額不符時不阻擋,但逐單列示差額,供判斷屬服務費或漏填。

Rows with missing required fields, non-numeric amounts, unknown customer codes, or duplicate order/tracking numbers are rejected with a per-row reason and nothing is imported. When itemized charges do not add up to Total Amount the import proceeds, and each affected order is listed with its difference.

5 · 結果判讀 Reading the comparison

各客戶之出貨依其指派之費率層級重算;未指派層級者不重算,重算與兩項差異留空。逐項表就每一費用並列三數:向客戶實收(綠)、系統重算(琥珀)、UPS 實收(棕),並推出兩項差異 —— 定價差異(實收重算,應收是否收足)與 UPS 差異(重算UPS,帳單與合約是否相符)。空欄代表該項未填,不以 0 計入合計。

Each customer's shipments are repriced at the assigned rate level; unassigned customers are not repriced and their figures stay blank. The itemized table sets three amounts side by side per charge — billed to client (green), recomputed (amber), charged by UPS (brown) — yielding the pricing variance (billed – recomputed) and the UPS variance (recomputed – UPS). Blank cells are unfilled entries and are excluded from totals.

附表 · 欄位一覽 Appendix — Columns at a glance

欄位 Column	性質 Role	規則 Rule
Order Number	識別 · 必填 Identity, required	唯一;逐項與總額均以此歸戶 Unique; keys every row
Tracking Numbers	識別 · 必填 Identity, required	多件以逗號分隔 Comma-separated for multi-piece
Customer Code	識別 · 必填 Identity, required	下拉限客戶名單 Dropdown from the client directory
Ship Date	識別 · 選填 Identity, optional	YYYY-MM-DD
37 項費用欄 charge columns	費用 · 選填 Charges, optional	填實收金額;空=未填,0=實收零 Billed amount; blank ≠ 0
Total Amount	總額 · 必填 Total, required	整單合計,固定最後一欄 Whole-order total, last column
