

快速設定流程

Quick Setup Workflow · UPS Reconciliation

從空帳號到第一次對帳。步驟 01–03 屬全帳號、各做一次;步驟 04 逐層重複;之後即為日常對帳循環。

From an empty account to the first reconciliation. Steps 01–03 are account-wide and done once; step 04 repeats per level; the rest is the everyday cycle.

1 · 設定步驟 Setup steps

步驟 Step	位置 Where	動作 Action
01	01 General Setting → 1. 層級設定 Level Setup	為每個客戶群建立費率層級;新層自動帶入預設渠道與帳號結構,費率留白 Create one level per client group; new levels carry the default channels and account structure, rates blank
02	03 渠道與附加費設置管理 Channels & Surcharges	確認渠道清單(預設已含 Zone),補自訂渠道、附加費與 Demand 期間 —— 一次新增,層層都有 Confirm the channel list (defaults ship with zones), add custom channels, surcharges and demand periods — once, for every level
03	01 → 2. 費用代碼設置/3. 系統設定 Charge Codes · System	維護代碼對照;確認判定來源、燃油適用範圍與啟用/停用 Maintain the code mapping; confirm classification source, fuel eligibility and enable/disable
04	04 渠道與附加費費率 Channel & Surcharge Rates	右上角切到目標層級:匯入基本運費、填附加費與 Demand 費率、本層燃油率與尺寸規則 —— 每層重複 Switch the Editing selector to the level: import base rates, fill surcharge and demand rates, fuel and size rules — repeat per level
05	02 帳戶與客戶 Account & Client Setup	指派每位客戶的費率層級;未指派者不重新計價 Assign each client's level; unassigned clients are not repriced
06	05 WMS / TMS 資料 WMS / TMS Data	依來源下載模板交同仁填寫;匯入先預覽、確認才寫入 Download the source's template for your team; imports preview first, then commit
07	06 帳單匯入 → 07 對帳分析 Invoice Import → Reconciliation	載入 UPS 帳單,檢視向客收費、系統重算與 UPS 實收的三方比較,匯出報告 Load the UPS invoice, review billed vs recomputed vs UPS charged, export the report

2 · 完成前的檢核 Checklist before go-live

☐ 03 的「已設費率層級」每列都到 N/N ☐ 各層材積除數與最低計費重符合合約 ☐ 每位客戶都指到正確層級 ☐ 費用代碼對照涵蓋帳單會出現的代碼

☐ Every levels-priced badge under 03 reads N/N ☐ DIM divisors and minimum billable weights match each contract ☐ Every client points at the right level ☐ The charge-code mapping covers the codes your invoices use
