

訂單模板填寫與對帳判讀指南

WMS / TMS Template & Reconciliation Guide • UPS Reconciliation

1 • 檔案與流程 Files and workflow

WMS 與 TMS 各自下載專屬模板、各自填寫,不共用同一份檔案。一張訂單一列;一票多件時,所有追蹤號置於同一儲存格,以逗號分隔,金額為整張訂單之合計。填妥後於「05 WMS / TMS 匯入」匯入;UPS 帳單(06)可先可後,兩者都到齊時系統自動比對,結果顯示於「07 對帳分析」。

WMS and TMS download and fill their own templates. One order per row; for a multi-piece order, place every tracking number in one cell separated by commas, with amounts totalled per order. Import the completed file under 05 WMS/TMS Import; the UPS invoice (06) can come before or after, and once both are in the comparison runs by itself and shows under 07 Reconciliation Analysis.

2 • 欄位規範 Column rules

版面固定為:識別七欄(深棕、凍結:出貨日、客戶代碼、單號、追蹤號、Channel、Zone、計費重量)→費用欄(琥珀,由同仁填入向客戶實收金額;WMS 9 欄、TMS 8 欄)→總收取金額(綠,固定於最後一欄)。費用欄依 WMS / TMS 實際的粒度設計:DAS 與偏遠地區合為一欄、加值處理一欄、簽名一欄,其餘為單項;另有「Other Fees (non-carrier)」承接服務費等非承運費用,各欄合計才對得上總額。欄名即系統之費用名稱,不得增刪或改名;客戶代號須為客戶名單上的代碼,Channel 填系統的渠道名稱;活頁簿內附 Customers 與 Channels 兩張對照分頁供參考,不設下拉。Ground 是一條渠道,不分商業/住宅,商住由系統依帳單判定。空白代表「未填」,0 代表「實收為零」,二者意義不同。活頁簿內附 Guide 分頁,逐欄說明填法。

Layout: seven identity columns (dark brown, frozen: Ship Date, Customer Code, Order Number, Tracking Numbers, Channel, Zone, Billed Weight), the charge columns (amber, filled with the amount billed to the customer; 9 on the WMS template, 8 on the TMS template) and Total Amount (green, always the last column). Charge columns follow the granularity WMS and TMS actually keep: DAS and Remote Area share one combined column, Additional Handling one, Signature one; the rest are single charges. Other Fees (non-carrier) takes service fees and similar non-carrier items so the columns add up to the total. Headers are the system's charge names and must not be renamed; Customer Code must be a code on the client list and Channel a system channel name; the workbook carries Customers and Channels reference sheets, with no dropdowns. Ground is one channel with no commercial/residential split; the system decides that from the invoice. Blank means not filled; 0 means billed zero — the two are not the same. A Guide sheet inside the workbook explains every column.

3 • 合併欄 Combined columns

下列合併欄各對應系統內的一組細項。填表時只填整組金額;系統比對時將重算與 UPS 兩側的細項加總為同一組,三方同一口徑。

Each combined column stands for a group of system charges. Fill the group total only; on comparison the recomputed and UPS sides are summed into the same group so all three figures share one definition.

Delivery Area / Remote Area Surcharge = DAS Commercial • DAS Residential • DAS Extended Commercial • DAS Extended Residential • Remote Area Commercial • Remote Area Residential • Remote Area - AK • Remote Area - HI

Additional Handling Surcharge(WMS) = Additional Handling Surcharge - Weight • Dimension • Packaging; Large Package Surcharge 於 WMS 模板自成一欄 / stays its own column on the WMS template

Additional Handling + Large Package Surcharge(TMS) = 上列三項加值處理費 + Large Package Surcharge / the three Additional Handling charges plus Large Package Surcharge

Signature / Adult Signature = Signature • Adult Signature

Demand、超大件、地址更正、退件等 UPS 開帳後才產生的費用不在模板上——出貨當下沒有這些數字。同一組不得同時填合併欄與細項欄;細項欄名僅為相容既有檔案保留,匯入時仍可辨識。

Charges that only exist once UPS has invoiced (Demand, Over Maximum, Address Correction, returns and the like) are not on the template — there is no figure for them at shipping time. A group must not carry both its combined column and its itemised columns; itemised headers remain recognised only so that files already in circulation still import.

4 • TMS 欄位對應 TMS column mapping

TMS 模板的費用欄順序與 TMS 匯出檔一致,整欄複製即可:Base Rate → Base Rate; Residential → Residential Surcharge; DAS → Delivery Area / Remote Area Surcharge; Fuel → Fuel Surcharge; Insurance → Declared Value; Signature → Signature / Adult Signature; Delivery Surcharge(含大包裹與加值處理)→ Additional Handling + Large Package Surcharge, 整筆填入、不必拆分; Service Fee → Other Fees (non-carrier)。Zone 填 TMS 計價所用之 Zone。

The TMS template lists its charge columns in the TMS export order, so each column copies straight across: Base Rate → Base Rate; Residential → Residential Surcharge; DAS → Delivery Area / Remote Area Surcharge; Fuel → Fuel Surcharge; Insurance → Declared Value; Signature → Signature / Adult Signature; Delivery Surcharge (Large Package and Additional Handling together) → Additional Handling + Large Package Surcharge, whole, no allocation; Service Fee → Other Fees (non-carrier). Zone is the

zone TMS priced with.

5 • 匯入檢核 Import validation

必填欄缺漏、金額非數值、客戶代號未建檔、單號或追蹤號重複者,該列退回並逐列說明原因,整份不匯入。同一組同時出現合併欄與細項欄,或兩種加值處理合併欄並存者,整份退回並點名欄位。各費用欄合計與總收取金額不符時不阻擋,但逐單列示差額,供判斷屬漏填。模板之 Channel、Zone 與系統判定不同者,逐單列示並於匯出之 Orders 分頁標記 MISMATCH; 計費重量只記錄不核對,與帳單之合約計費重量並排列於 Orders 分頁供參考;模板寫了系統沒有的渠道,預覽時列出,勾選即一併新增(Zone 留白,基本運費另行匯入)。

Rows with missing required fields, non-numeric amounts, unknown customer codes, or duplicate order/tracking numbers are rejected with a per-row reason and nothing is imported. A file that carries both a combined column and its itemised columns, or both Additional Handling combined columns, is rejected with the clashing headers named. When itemized charges do not add up to Total Amount the import proceeds, and each affected order is listed with its difference. Orders whose template channel or zone differs from what the system determined are listed and flagged MISMATCH on the exported Orders sheet; billed weight is recorded, not checked, and sits beside the invoice's contract billed weight on the Orders sheet for reference; a channel the system lacks is listed on the preview and added when ticked (zones blank, base rates imported separately).

6 • 結果判讀 Reading the comparison

各客戶之出貨依其指派之費率層級重算;未指派層級者不重算,重算與兩項差異留空。逐項表就每一費用並列三數:向客戶實收(綠)、系統重算(琥珀)、UPS 實收(棕),並推出兩項差異——定價差異(實收 - 重算,應收是否收足)與 UPS 差異(重算 - UPS,帳單與合約是否相符)。合併欄以組列呈現,細項縮排列於其下,僅有重算與 UPS 兩數;向客戶實收為整組一數。空欄代表該項未填,不以 0 計入合計。

Each customer's shipments are repriced at the assigned rate level; unassigned customers are not repriced and their figures stay blank. The itemized table sets three amounts side by side per charge — billed to client (green), recomputed (amber), charged by UPS (brown) — yielding the pricing variance (billed - recomputed) and the UPS variance (recomputed - UPS). A combined column appears as one group row with its members indented beneath it, carrying recomputed and UPS figures only; billed to client is one figure per group. Blank cells are unfilled entries and are excluded from totals.

附表 • 欄位一覽 Appendix — Columns at a glance

欄位 Column	性質 Role	規則 Rule
Order Number	識別 • 必填 Identity, required	唯一;逐項與總額均以此歸戶 Unique; keys every row
Tracking Numbers	識別 • 必填 Identity, required	多件以逗號分隔 Comma-separated for multi-piece
Customer Code	識別 • 必填 Identity, required	須在客戶名單;Customers 分頁可對照 Must be on the client list; see the Customers sheet
Ship Date	識別 • 選填 Identity, optional	YYYY-MM-DD
Channel	識別 • 選填 Identity, optional	系統渠道名稱,見 Channels 分頁;Ground 不分商住 System channel name, see the Channels sheet; Ground 有 no com/res split
Zone	識別 • 選填 Identity, optional	計費用 Zone;與帳單核對 Zone used for pricing; checked against the invoice
Billed Weight (lb)	識別 • 選填 Identity, optional	向客戶計價的計費重量,整單合計;只記錄不核對 Weight the client was charged on, whole order; recorded, not checked
Delivery Area / Remote Area Surcharge; Signature / Adult Signature	費用 • 合併欄 Charges, combined	整組實收金額;不得與細項欄並存 Group total; never alongside its itemised columns
Additional Handling Surcharge(WMS)/ Additional Handling + Large Package Surcharge(TMS)	費用 • 合併欄 Charges, combined	WMS 的 LPS 另填 Large Package Surcharge;TMS 整筆填合併欄 WMS keeps LPS separate; TMS fills the combined column
Base Rate, Residential Surcharge, Large Package Surcharge (WMS), Declared Value, Fuel Surcharge	費用 • 單項 Charges, single	填實收金額;空=未填,0=實收零 Billed amount; blank ≠ 0
Other Fees (non-carrier)	費用 • 非承運 Charges, non-carrier	服務費等;只有向客戶收 Service fees etc.; billed side only
Total Amount	總額 • 必填 Total, required	整單合計,固定最後一欄 Whole-order total, last column
